DETAILED ACTION

Information Disclosure Statement

The IDSes filed 9/05, 12/05, 5/06 and 10/06 have all been considered and placed of record. The initialed copies are attached herewith.

Specification

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

Claims 1 and 5 are objected to because of the following informalities: the phrase "when the detected charging efficiency can be regarded as zero" is indefinite because it does not concretely and resolutely define the efficiency in mathematical term. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2838

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Arai et al. (US 6,696,818). The reference discloses a charging efficiency is computed to be zero. See column 9, lines 49-51.

Conclusion

Any inquiry concerning this communication should be directed to the Examiner at the below-listed number on every Tuesday, Thursday and Saturday.
